Mobiloil Arctic

1. GIVES FULL PROTECTION AT 400°F

DON'T buy half a winter oil if you want your engine to last—if you want to keep winter repair expense down—get your money's worth when you buy winter oil. Get the double-range winter oil—Mobiloil Arctic. Get double value—double protection.

With Mobiloil Arctic—on coldest days—you always get a quick start. No grinding wear from slow starting with an oil that has cold-stiffened in your crankcase and can't circulate. Mobiloil Arctic circulates with the first turn of your starter.

And—much more important—with double-range Mobiloil Arctic you get full protection when your engine gets hot. Mobiloil Arctic does not break down when engine temperatures soar up to 400°F.

In winter your engine needs two kinds of lubrication. Be sure you get both! Ask for Mobiloil Arctic by name. Throughout the world this is the largest-selling winter oil, because it is double-range.

There is a Mobilil dealer near you.

Serving the Wires That Serve the Nation

INTERNATIONAL TRUCKS give unfailing support to public utilities

OVER a vast network pattern the power that lights the cities, heats the schools and spreads the messages of the nation. Against rain, wind and steel, hail and snow, flood and fire, the great public utilities fight an eternal battle. Here, management and mechanics are used unceasingly to maintain unfailing service—work to business and consumer—often to life itself.

In this exacting field, International Trucks have long been favored because they render unfailingly the type of service the vast utility requires. International sturdy construction means uninterrupted service under grueling conditions. These recently engineered trucks are economical in operation—an important factor in all industries, large and small, power included.

Internationals are backed by the organized service of 186 company-owned branches in Canada and the United States and well-equipped dealers everywhere.

International Trucks are available in such a wide variety of sizes and types and with such an endless choice of bodies and equipment that complete standardization on these good trucks is possible for every business—and especially logical from the dollar-and-cents standpoint!

If the great public utilities can save money and improve service with Internationals—so can your business—no matter what or where it is. The quickest way to make sure it is to go to the nearest International Harvester branch or dealer, choose the particular model you need, and that is thoroughly as your own job. Then compare the cost!

A Long Load Combined Truck Body for Light Line Construction

Planned for the largest load—10,000 lbs. Model 45 is a 3-ton truck. The chassis will actually load it up to the body and equipment. Tires which load up with construction equipment and a group of men go well within rated capacity. Pulling power is built into the chassis. The chassis is built to take full power of engine available, so much which has 4 forward and 1 reverse speeds. Breaks will handle pull up to 40 tons.

Suddenly, in the midst of a lecture on the history of the United States, the speaker turned to the audience.

"Now, let me ask you a question," he said. "What year was it that the United States was founded?"

"1776," someone called out.

"That's right," he said. "1776. Now, let me ask you another question. What year was it that the United States became a republic?"

"1787," someone called out.

NIGHTS of shallow, restless sleep caused by drinking tea and coffee which contain tannin and caffeine, make a face shabby. Eyes lose the area when nerves twitch in sleeplessness. There are, of course, many people who can drink tea and coffee in moderation without feeling the ill effects—without suffering from sleeplessness or any disturbing disorders. But not everyone, by any means. If tall tales wanderers awoke by sleeplessness are creeping up on you, here is good news.

Drunk Portion This appetizing, restaurant hot drink will benefit you and each member of the family because it contains not a single trace of any drug alcohol, nor is it acid-forming as are some beverages. Instantly made in the cup, costs about half-a-cent. 50 cups is a 50¢ tin. Or there's Portion Cereal, made by boiling in preceding 30 minutes.

There was such firm authority in the way that even the half-breed man of Abasco de Guadalupe was more than half-tempted by it. Surely the other half will stand up with reason.

"What you are promising is impossible!"

"Will you make the experiment?" Will you make it as I require?" the other insisted. It is your only hope.

Despondent, there came the answer: "I mean, I mean!" and in pursuit of it the path was dimly, uncertainly, glided at that time towards dawn.

Is Inflation Desirable

Continued from page 17

There are some ways in which inventory expansion may take place in Canada. Since it takes on much more efficiency and is handled than others, OTC of the bank is undoubtedly that which was used last November. The bank borrowed money from the Government under the Finance Act for the necessary (although some being needed for the purpose). The Government also lent money for some operations from the bank and this is the important point—and the point which provides a big question. Is the money, money was raised and not, in fact, to put operations between the bank and the government.

Another way in which monetary expansion might be achieved is by improving the foreign exchange rate. If the value of the Canadian dollar declined to New York and London this would mean that our exports, for which payment is made in foreign currencies, would sell more Canadian dollars to Canadian residents. This in the price of our exports would rise immediately to the level noted at which our foreign and domestic populations. The inflationary gap in price which was sought would be under way immediately. The proposed solution

There is a variety of opinions as to why there is a likely to be such a large increase. It is likely to be due to the fact that the increase in the number of people who are likely to be employed in the service sector is likely to be much larger than the increase in the number of people who are likely to be employed in the manufacturing sector. This is likely to be due to the fact that the service sector is likely to be more labour intensive than the manufacturing sector.

We achieved exactly what we set out to do, and we are disappointed for the purpose of increasing the credibility of the value of money that existed. We have demonstrated to the international community of the free world that the United States could not be a partner in a partnership of power without a change. So long after we know that governments do not need to be as good as they are, which they already possess to show their democracy.

[illegible]

During the years 1955-59 the capital outflows in the budget of the Government in constant international dollars for 1955-59:XX. This was financed by borrowing. If the present policy had been in force, this money would presumably have been "exported". Thus the total volume of foreign sales maintaining might not have been overly by the 1959:XX which they really did—see 1959:XX-59 for 1959:XX—but they might have been

AND Thousands of women write "No soap like Rinso!"

THOSE who use this thrifty, work-saving soap for the first time are thrilled.

"It gets my clothes much whiter than any soap I've ever used!" marvels Mrs. Fannie Combs.

"It whips into rich, safe suds so quickly," declares Mrs. H. O. Turner.

According to Mrs. E. M. Hedrick "Rinso is very economical—a little goes so far." Like millions of others she has found that Rinso gives twice as much suds, cup for cup, as lightweight, puffed-up soaps—even in hardest water! No softener needed.

These soapy, lasting suds wash linens so white, boiling isn't necessary. Coloured clothes come bright as new.

Wonderful, too, in washing machines

The makers of 40 famous washers recommend Rinso for safety and for whiter, brighter clothes. Its lively suds are great for dish-washing, and all cleaning. Get the BIG household package.

SAFE for your finest cottons and linens—white or colours
